My research primarily concentrates on the effects on the labour force, food (in)security, health, and inequality, thereby aiding in the formulation of targeted strategies to mitigate and adapt to climate-related impacts. I lead the ISIMIP labour impacts sector, and recently led the health risk evaluation for the first European Union Climate Risk Assessment mandated by the European Parliament. I am an author of the Global, Europe, Latin America, and SIDS reports of the *Lancet* Countdown on climate change and health.
